INSTANTPDF 10

Enfocus Instant PDF 10 makes producing press-ready PDFs easy for creative professionals. Using award-winning Enfocus Certified PDF® technology, it's the simplest and most reliable way to create PDFs that comply with your print or advertisement vendors' specifications.
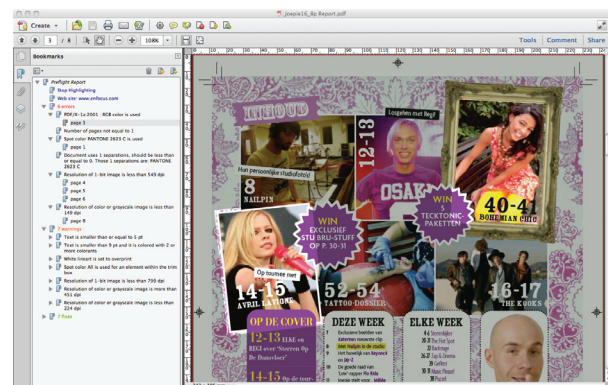

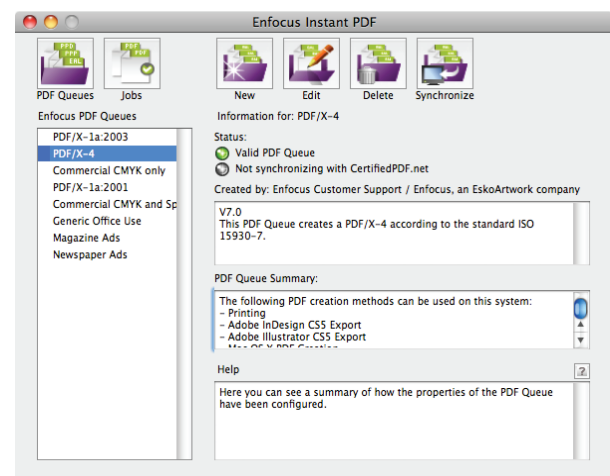

While working in your favorite creative application (Adobe® InDesign®, Adobe® Illustrator®, QuarkXPress™, Adobe® Acrobat®) simply select "Save as Certified PDF..." from the File menu and let Instant PDF 10 take care of creating your PDF, preflighting it, modifying it where necessary, and even sending it to your print provider – all without leaving your application!

As a creative professional, you can now remain productive in your familiar environment without having to worry about print styles, PDF export or other complicated PDF creation settings.

So who takes care of the technical stuff?

Instant PDF 10 is unique in that it allows pre-press experts to define PDF Queues that contain all the PDF creation settings required for outputting quality PDFs. PDF Queues can be distributed as files or published on CertifiedPDF.net from where designers can automatically import them into Instant PDF 10. The built-in synchronization feature with CertifiedPDF.net guarantees imported PDF Queues remain up-to-date, ensuring ongoing consistency with your printer, publisher or industry association specification, including PDF/X-1a, PDF/X-3, PDF/X-4 and Ghent PDF Workgroup. All of which means that once a PDF Queue is imported, document creators are ready to produce press-ready PDFs without agonizing over the technical aspects of PDF file creation.

For print providers, Instant PDF 10 significantly reduces the load on customer service and pre-press operators because Certified PDF files are always output correctly right at the designer's workstation. With award-winning Enfocus Certified PDF® technology, the files are flagged as ready for output from the moment they arrive in your inbox.

WHY CHOOSE INSTANT PDF?

HIGHLIGHTS

Easy problem identification through reporting
Instant PDF users rely on Enfocus' error reporting when using Instant PDF, but don't want to waste time searching for identified errors. With the new annotated report they see the problem areas in a glance. Problems are identified immediately and can be quickly resolved, allowing them to move on to the next job and save valuable time.

PitStop Library 10 and Support for Major Standards and Popular Applications
Building **Instant PDF 10** on the latest PitStop Library means that operators enjoy the same level of error identification and correction as highest-end Enfocus application sites.

Other Instant PDF developments have turned it into one of the most robust tools in a designer's arsenal. These advancements include support for the latest Apple OS X 10.7 Lion; the latest Adobe applications (Adobe CS 5.5) as well as AcrobatX/Distiller; and previous updates including support for the latest PDF/X standards, preflight checks, color engines, and integration with Enfocus' Switch automation solution. Together these combine to substantially elevate the capabilities of organizations using Instant PDF.

Deliver final PDFs directly to Enfocus Switch
If your printer or publisher is using **Enfocus Switch** to automate prepress tasks, **Instant PDF** can now deliver final PDF files directly to a Submit Point in Switch. Simply enter the name of the server, username and password you received from your printer or publisher into your PDF Queue in Instant PDF and one-stop delivery straight to a production flow is a fact.

WHAT CUSTOMERS SAY

"All our contributing design agencies are required to use Instant PDF, with our dedicated profiles, to output all PDF files they send to us. On a wider scale, we're convinced that **Instant PDF is a tool every designer should use.**"

Axel Robert, prepress QA manager at Ubisoft

DID YOU KNOW?

Instant PDF delivers PDF files directly into **Switch**. If your printer or publisher is using Switch to automate prepress tasks, Instant PDF can now deliver your PDF directly to a Submit Point in Switch.
