Innovators in PDF Technology
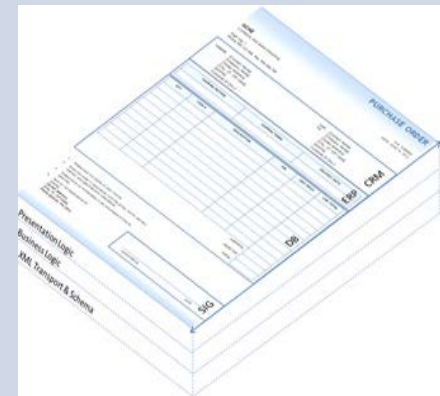

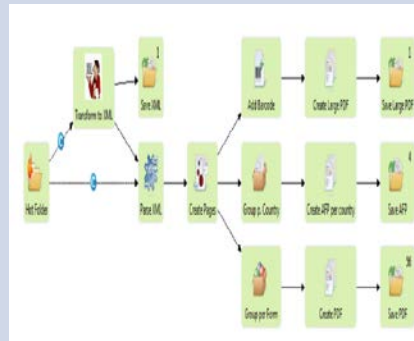

# Business Challenges

| Dynamically generate personalized documents	Create automated document workflows involving forms, XML, digital signatures	Comply with standards: security, digital signature, accessibility, archiving, ISO	Make documents Interactive and Searchable by ERP, CRM, DB and ECM systems

ITEXT

The current ways are insufficient

- ☰ Creating documents manually or semi-manually…
- ☰ Developing code and learning PDF on your own…
- ☰ Buying expensive suites like Adobe…
- ☰ Using "Free" unsupported libraries…
- ☰ Just keep doing it on paper…
- ☰ Never knowing if you're compliant…

ITEXT

iText: A better way to generate PDF

XML
XHTML
Web forms
Databases

PDF/A
PDF/UA
Digital signatures
PDF templates

☰ Incorporating directly into your software, web portal or application

- iText is used to create PDF documents programmatically, with or without minimal human intervention

☰ Using a developer library

- Does not require special knowledge of PDF
- Code that doesn't have to be written can be implemented much faster
- Available for Java, .NET, Android and GAE

iText helps your business

1 Integrates with your systems

2 Complete, fast and reliable

3 Fully Standards compliant

ITEXT

Developers love iText

1 Full control   **2** Superb results   **3** Quick developer productivity

ITEXT

iText Features

Archiving
PDF/A

Accessibility
PDF/UA

Digital signature
PAdES

Dynamic forms
filling and flattening

E-invoicing
ZUGFeRD

Interactivity
links and bookmarks

Assembly
merging and splitting

Searchability
data extraction

Encryption
and watermarks
