What's New in PdfCompressor 6.5?

A high-powered PDF optimization solution for corporate environments

As a leader in PDF technology, CVISION Technologies understands the software needs of business environments. In order to maximize productivity, organizations need high-powered PDF solutions that increase efficiency while integrating with existing workflows.

With best-in-class OCR & dramatic file compression, the newly updated PdfCompressor 6.5 is designed to optimize PDF documents, making them smaller, faster, and easier to view and transfer. Smaller file sizes not only facilitate reduced storage costs but also accelerate document accessibility and transmission of documents on mobile, desktop and beyond. Built for high-volume, corporate environments, PdfCompressor 6.5 integrates seamlessly into existing workflows to allow organizations to spend less time managing their digital files and more time on value-producing tasks.

PdfCompressor 6.5 now features:

- Updated OCR engine for even more reliable text searches

- Improved compression of both image documents and electronically generated PDF files

- More efficient processing of electronic PDF components

- Option to split multi-page input files during compression

- Ability to export recognized OCR text to .docx and .epub formats

- Support for the SFTP file transfer protocol in remote file processing

- Ability to compress a list of files and/or folders to a single arbitrary filename

- Support for CMYK decoding algorithms for color TIFF files

- Improved Arabic text recognition support
