

PDF/A-4, PDF/X-6 and the other new PDF standards...

...based on PDF 2.0

PDF 2.0

October **PDF**est ONLINE

Overview

- PDF 2.0 dated revision
- Subsets
 - PDF/A (and PDF/E)
 - PDF/X and PDF/VT

PDF 2.0 (2017) news - recap

- New features to define color in a device independent way, e.g. page level output intent profiles
 - ➔ All subset standards require device independent colors (by means of a source profile or the output intent)
- Encryption and signatures (Unicode passwords, more powerful algorithms, PAdES)
- Page metadata (DPart metadata from PDF/VT)
- ...

PDF 2.0 → PDF 2.0:2020

- Changed character collections
(CMAPs with new JP era glyph and other changes)
- Clarification of the alternate image selection algorithm
- Tagged PDF: Parent-child relationships (Annex L)
- How to extend PDF (Annex E)
- How to handle PDF versions and compatibility (Annex I)
- Normative references updated...

PDF 2.0:2020 Normative references

- PDF Association now maintains a list of resources at <https://www.pdfa.org/iso-32000-normative-references/>

A screenshot of a web browser displaying the PDF Association website. The browser's address bar shows "insiate" and "BS/". The website header includes the PDF Association logo, a search icon, and navigation links: "About Us", "Discover", "News", "Events", "Resources", "Community", "Member", and a "MEMBER AREA" button. The main content area has a red background with the title "ISO 32000 Normative References". Below this, there is a paragraph explaining that the ISO Online Browsing Platform is supposed to provide public access to various clauses of ISO publications, but it is not working for ISO 32000 and some other ISO publications referenced by PDF 2.0. It also notes that not all publications listed below are freely available. Another paragraph states that the page encompasses ISO/FDIS 32000-2:2020's normative references, bibliography, and additional materials. A third paragraph mentions that the page is maintained by ISO 32000 Project co-Leader Peter Wyatt and provides a link to get in touch if necessary changes or updates to the documents listed below. The date "LAST UPDATED: 3 July 2020" is also displayed. The section "Normative references" follows, with a paragraph stating that the following documents are "normatively referenced" from ISO/FDIS 32000-2:2020. That is, some or all of their content constitutes requirements of the updated 2020 dated revision edition of the PDF 2.0 specification. A further paragraph explains that for dated references, only the edition cited applies, and for undated references, the latest edition of the referenced document (including any amendments or corrigenda) applies. The list of references includes: ISO 3166-1, Codes for the representation of names of countries and their subdivisions – Part 1: Country codes, with a link to https://www.iso.org/standard/72482.html; ISO/IEC 8824-1, Information technology – Abstract Syntax Notation One (ASN.1): Specification of basic notation, with a link to https://standards.iso.org/ittf/PubliclyAvailableStandards/index.html; ISO/IEC 10646, Information technology – Universal Coded Character Set (UCS), with a link to https://standards.iso.org/ittf/PubliclyAvailableStandards/index.html; and ISO/IEC 10918 (all parts), Information Technology – Digital Compression and Coding of Continuous-Tone Still Images: Requirements and guidelines (informally known as the JPEG standard, for the Joint Photographic Experts Group, the ISO group that developed the standard), with a link to https://www.iso.org/search.html?q=10918 (Note: this URL is a search query on ISO).

PDF 2.0 → PDF 2.0:2020 (4)

- From an end user point of view not very exciting
- From a vendor point of view very much, parties should check “their” chapters and search for “(2020)”
- PDF 2.0:2020 (or 2021) is a very clean basis for a new series of subset standards...

A photograph of a server room with rows of server racks on both sides of a central aisle. The racks are filled with electronic equipment and have blue indicator lights. The floor is dark, and the walls are a light color. The text "PDF/A-4" is overlaid in the center of the image.

PDF/A-4

PDF/A-4 eases PDF/A conversion

- Removed or relaxed provisions
- More features (fewer conversion requirements)
- Close relationship to PDF/X-6 and PDF/UA-2 (once published)

Removed provisions

- No Extension Schemas XMP
- No synching of XMP with Document Information dictionary (because the Document Information dictionary is deprecated)
- No CIDSet and CharSet requirements
- No implementation limits
- Almost all pain points for conversion addressed

Live forms (and annotations)

- Relaxed requirements for form fields
- Actions and JavaScript permitted
- May only be executed when invoked by user
- All trigger events (AA entries) permitted
- Relaxed requirements for annotations
- Certain trigger events
(only those ones directly triggered via direct user interaction with the annotation)

☐ VOID ☐ CORRECTED

PAYER'S name, street address, city or town, state or province, country, ZIP or foreign postal code, and telephone no.		1 Rents \$	OMB No. 1545-0115 2019 Form 1099-MISC	Miscellaneous Income

RECIPIENT'S name		7 Nonemployee compensation \$	8 Substitute payments in lieu of dividends or interest \$	
Street address (including apt. no.)		9 Payer made direct sales of \$5,000 or more of consumer products to a buyer (recipient) for resale <input type="checkbox"/>	10 Crop insurance proceeds \$	
City or town, state or province, country, and ZIP or foreign postal code		11	12	
Account number (see instructions)	FATCA filing requirement <input type="checkbox"/>	13 Excess golden parachute payments \$	14 Gross proceeds paid to an attorney \$	

15a Section 409A deferrals 15b Section 409A income 16 State tax withheld 17 State/territory/state ex. 18 State income

More features from PDF 2.0

- Page level output intents
- Signatures
 - Simple digital signatures (no time stamp)
PAdES-BES or PAdES-EPES
 - Enable validation after expiration of certificate
PAdES-T
 - Enable re-signing after expiration
PAdES-A
 - Proof of existence
PAdES-DT

Conformance levels deprecated

- “U” (unicode) deprecated
 - 100% unicode not supported by various creators, in PDF/A-4 only “should”
- “A” (accessibility) deprecated
 - Much more comprehensively addressed in PDF/UA

New: PDF/A-4f and PDF/A-4e

- PDF/A-4f
 - Successor to PDF/A-3 (conformance levels B, A and U)
 - Arbitrary embedded file formats plus metadata
- PDF/A-4e
 - Successor to PDF/E (engineering)
 - 3D models in U3D or PRC plus embedded files with further information

PDF/A-1b, PDF/A-2b → PDF/A-4
PDF/A-3 → PDF/A-4f
PDF/E → PDF/A-4e

Why use PDF/A-4?

- From a standards point of view no reason to change - or not to change
- Reasons to change
 - Easier and more straightforward conversion
 - Removed or relaxed provisions
 - More features (fewer conversion requirements)
 - Close relationship to PDF/X-6 and PDF/UA-2 (once published)...

A close-up, dynamic shot of a large-format printer in operation. The printer's white frame and black mechanical components are visible as they move along a long roll of paper. The paper is being printed with a vibrant, multi-colored graphic featuring curved lines in shades of purple, blue, yellow, and green. The motion is blurred, suggesting a fast-paced printing process. A white rectangular box with the text 'PDF/X-6' is overlaid on the center of the image.

PDF/X-6

Combining PDF/A with PDF/X?

- Coming from PDF/A
 - Making sure that the file is prepared for print
 - Stricter requirements for color
- Coming from PDF/X
 - More robust rendering on screen
 - Formal reasons (national archives)
- ~ 50% of the requirements are identical

PDF/X-6 “inherits” from PDF/A-4

- Syntax provisions
- Annotations and forms permitted
 - Appearance (PDF syntax) is required by PDF 2.0

Conformance levels

October **PDF**est ONLINE

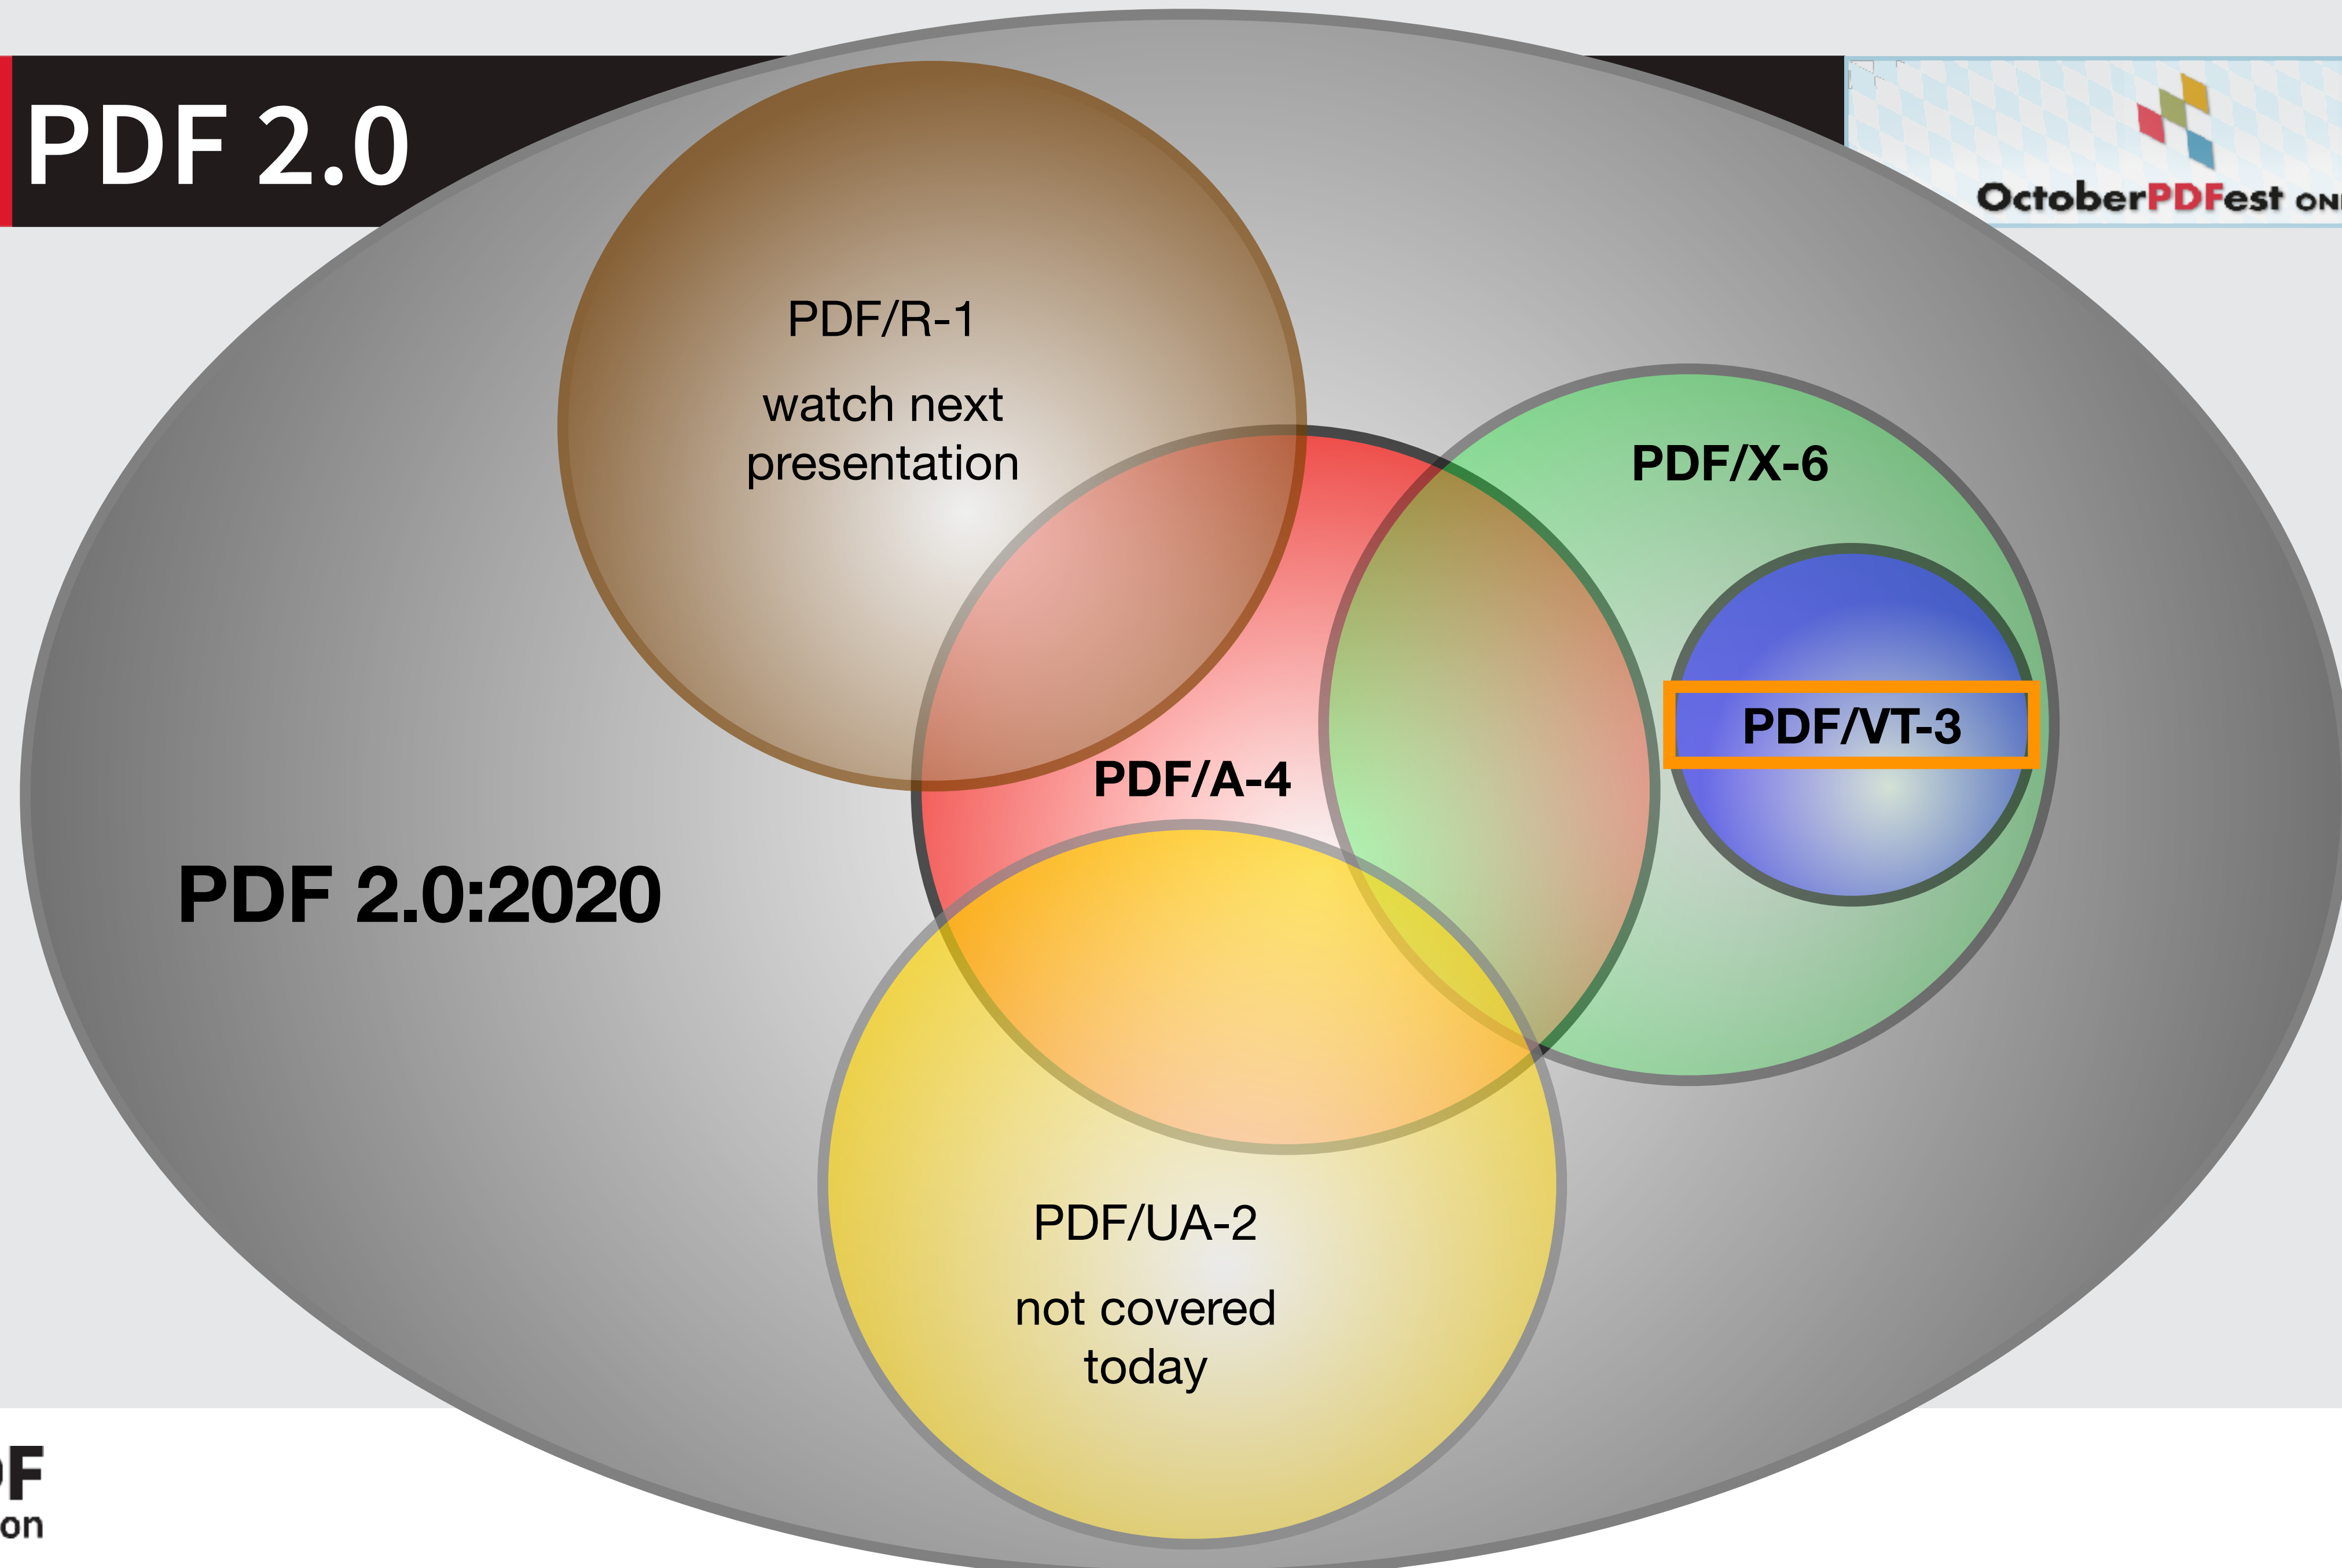

- Multi-channel color (CMYKOGV)
PDF/X-5n ➡ **PDF/X-6n**

- Referenced ICC profiles in output intent (smaller file sizes)
PDF/X-5p ➡ **PDF/X-6p**

A large, white industrial machine, likely a paper mill or recycling plant component, featuring a control panel with a screen and buttons. The machine has multiple compartments and a conveyor system. Yellow bins are visible on the right side, and a metal grate is at the bottom. The machine is set against a background of a perforated metal wall.

PDF/VT-3

Hierarchical DPart metadata

- Processing (binding, folding etc.) and/or recipient information
- DPart syntax now defined in PDF 2.0
- Standard fields and values for various use cases defined in related standard: Print Product Metadata (ISO 21812-1)
- PDF Association TWGs and LWGs have just started to create Application Notes

Interested in ISO work?

- It was never as easy to join (for members)
- ISO TC171 SC2 - December 7 through 15
 - PDF 2.X Next
 - PDF/UA-2
 - XMP
 - 3D PDF
 - PDF/A

Virtual ISO Meetings TC 171

Meeting Schedule for December 7 through 15, 2020

Meeting	Day	Times Central Europe / US Eastern
TC 171 SC2 WG8 PDF 2.0 dated revision	Monday 7th	14:00 – 20:30 (CET) 08:00 – 14:30 (ET)
TC 171 SC2 WG9 PDF/UA	Tuesday 8th	14:00 – 20:30 (CET) 08:00 – 14:30 (ET)
	Wednesday 9th	14:00 – 20:30 (CET) 08:00 – 14:30 (ET)
TC 171 SC2 WG12 XMP	Thursday 10th	14:00 – 17:00 (CET) 08:00 – 11:00 (ET)
TC 171 SC2 WG7 PDF Engineering	Thursday 10th	17:30 – 20:30 (CET) 11:30 – 14:30 (ET)
TC 171 SC2 WG5 PDF/A	Tuesday 15th	14:00 – 16:00 (CET) 08:00 – 10:00 (ET)

Please find draft agendas for each of the meetings attached to this document.

PDF/A-4, PDF/X-6 and the other new PDF standards...

...based on PDF 2.0

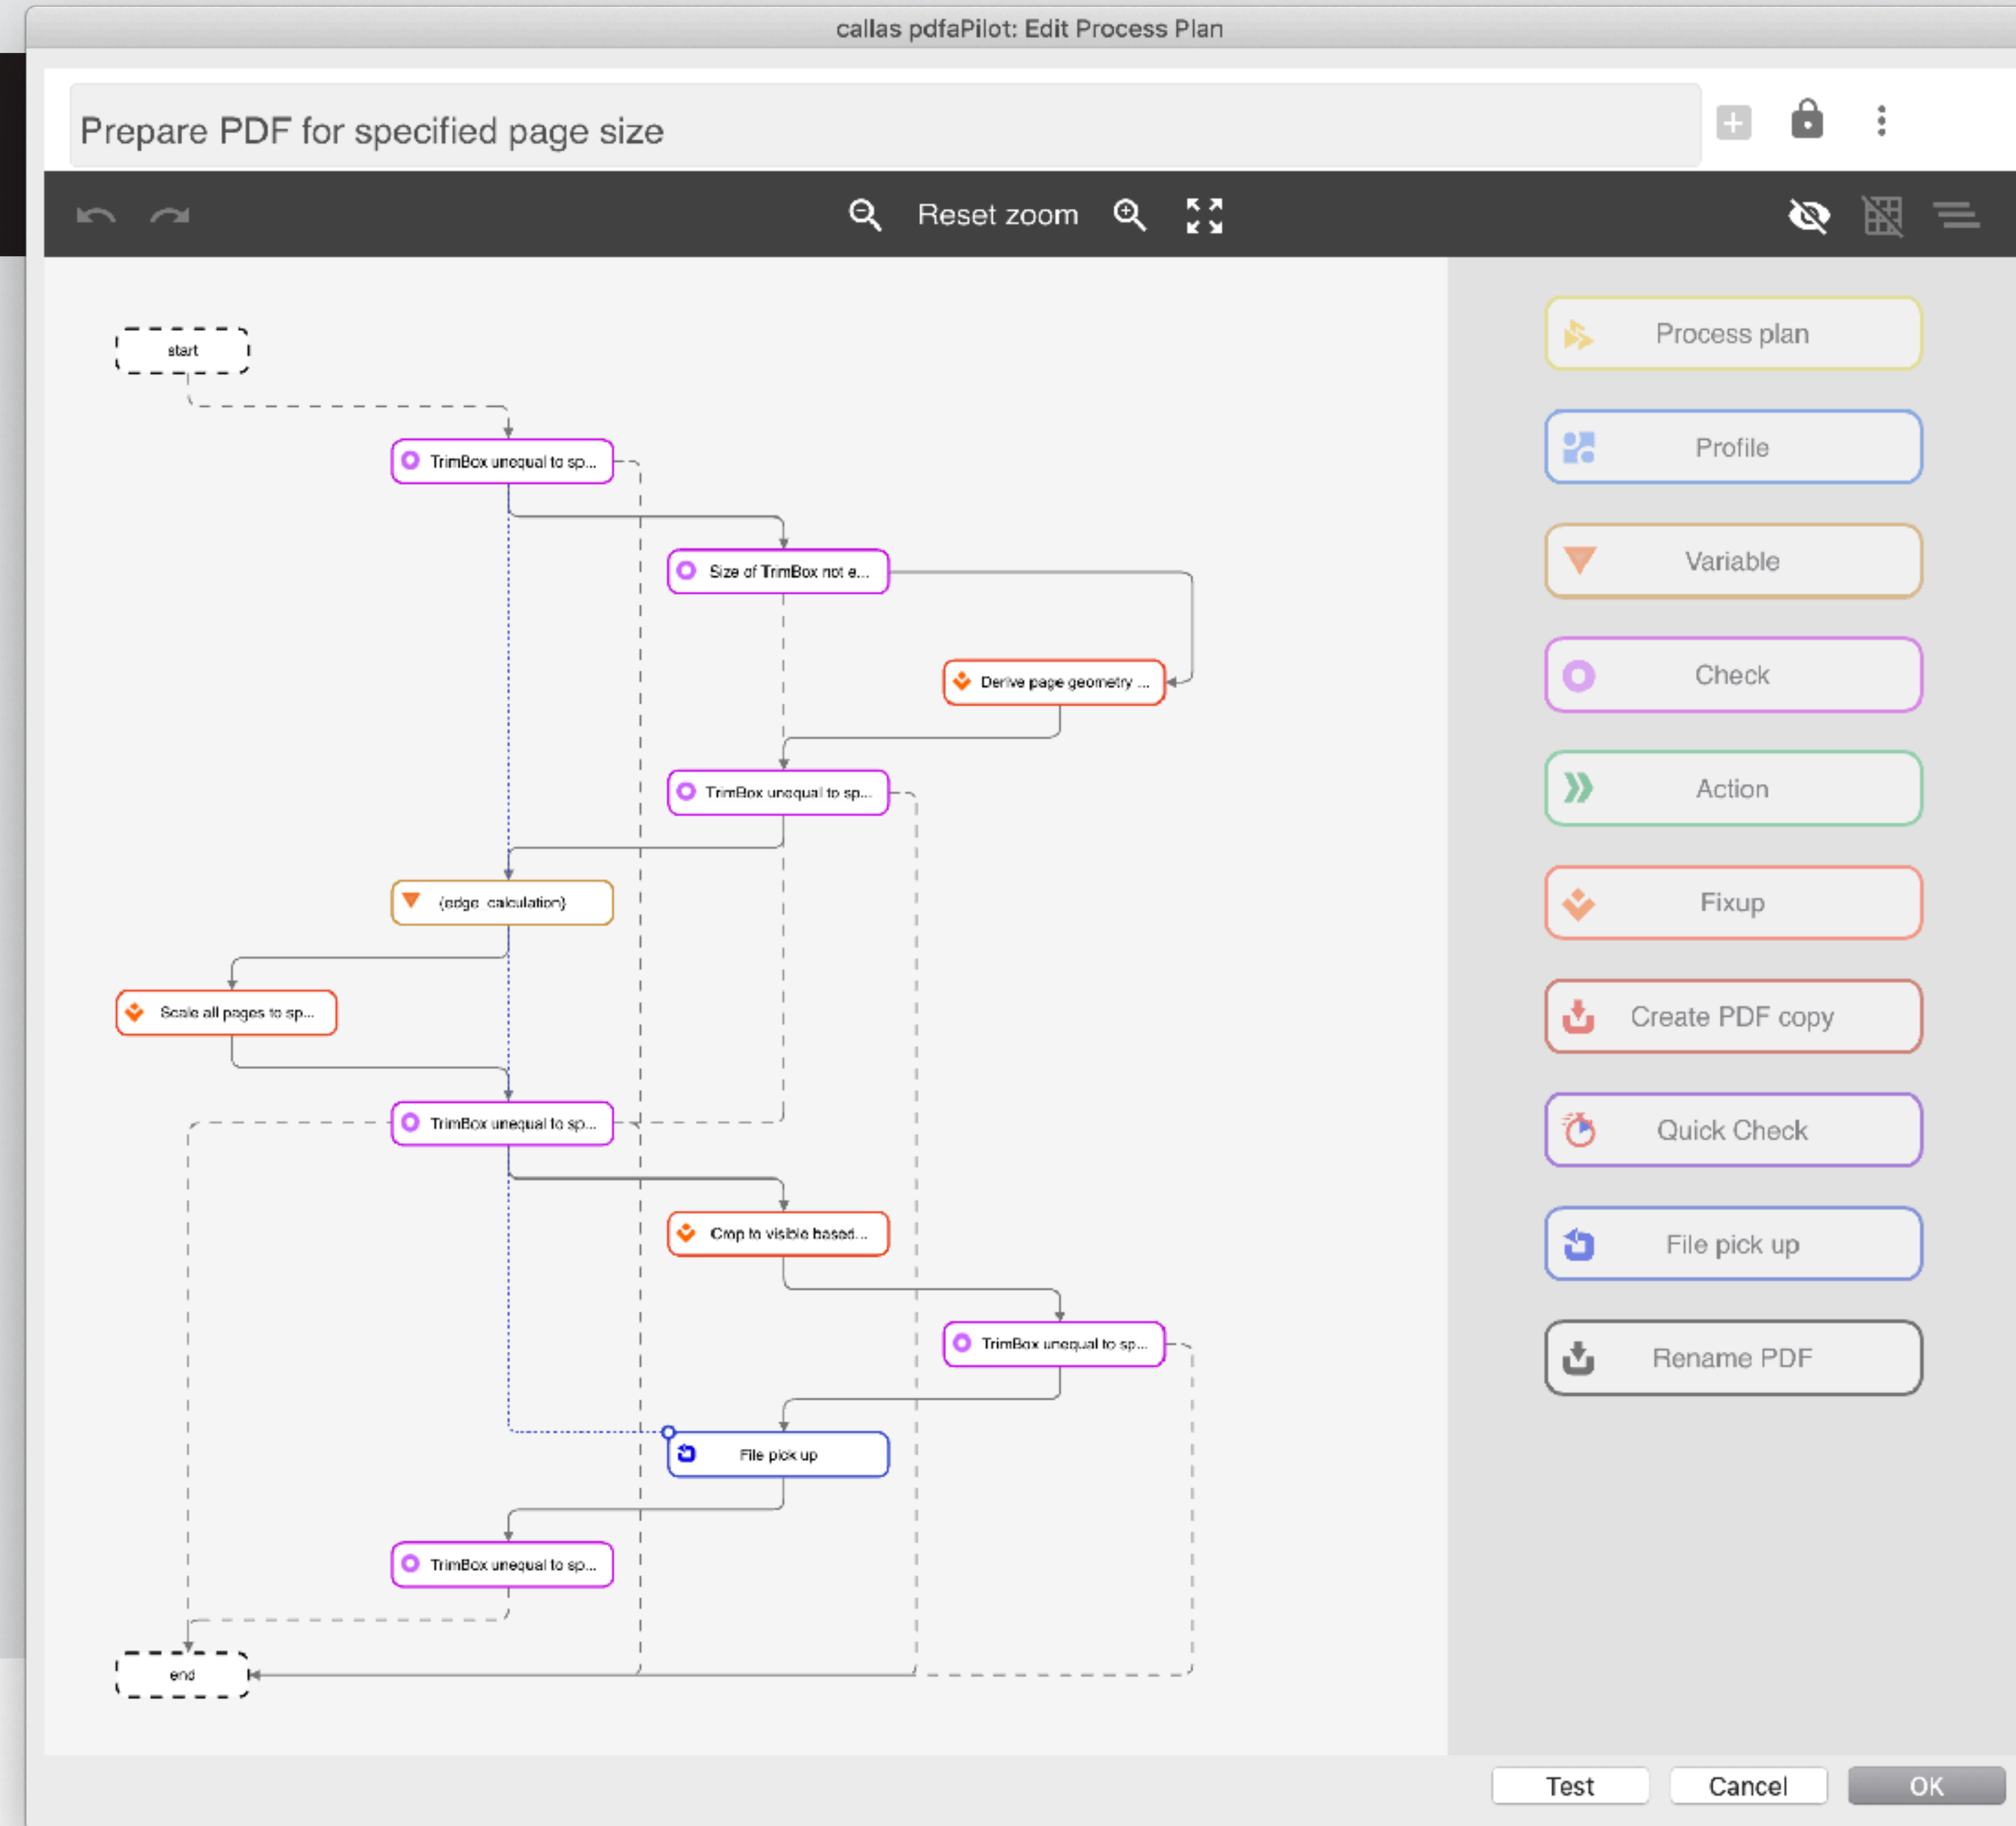

- Technology with strong support for PDF based ISO standards
- Usually validation and conversion for new standards available when they are published
- Same technology as in Adobe Acrobat, Foxit Phantom and others

- Customizable validation and conversion (Profile based)
 - Merge PDF/A and PDF/X Profiles
 - Add additional requirements (Checks)
 - Add or modify corrections (Fixups)
- Design Profiles in pdfaPilot Desktop,
use them in pdfaPilot CLI or pdfaPilot SDK
